1. Custo Barcelona

Spanish internationally renowned designer Custo Dalmau has just launched in Spain the first fragrance of the brand. It was created by IDESA

PARFUMS and launched in October 2008.

This is an edition for women, an eternal combination of fashion, culture, journeys and mysterious secrets which will be revealed by the future. This modern edition was presented in creator **Custo Barcelona**'s style: with a wide range of colours and unusual modernistic expression worth your attention.

Perfume **Custo Barcelona** is a warm perfume, which introduces sensual experience, full of spices, life, joy and power. The woman who will use it is a real cosmopolitan, has adventurous spirit, is unconventional and open to styles of future.

The provocative and elegant elixir **Custo Barcelona** opens with aromas of bitter orange, luminous citrus cocktail of Calabrian lemon, pink grapefruit and Mediterranean bergamot. The heart reflects unique fruity aromas of wild strawberries and black currant decorated with floral waves of peony and orange blossom. The base notes include woody accords of lemon tree combined with hot amber, musk and elegant patchouli, which rounds up the composition. Creator of this edition is perfumer [Alberto Morillas](#).

The bottle and the package are modern and revolutionary since they are made of various materials. Such a mixture of structures and rough surfaces has not been used in production of bottles and packages yet. Creators Pati N^o16ez and Toni Arola were in charge of design of the new edition.
